

MINNESOTA CANOLA FARMERS HEAR FROM INDUSTRY EXPERTS AT CANOLA SYMPOSIUM

Canola farmers in northwestern Minnesota gathered recently to hear experts from across the region discuss all aspects of canola production at the Council's [2021 Canola Symposium](#) held December 7 at the Community Center in Roseau. Farmers, industry representatives, and university personnel enjoyed educational sessions covering current and future research, new industry innovations (*Canola Spotlight*), canola market outlooks, political implications of a new administration, and a wide range of canola-related topics to help farmers prepare for a successful 2022.

"This year's Symposium featured an impressive lineup of canola experts who discussed everything from agronomics to economics," said Beth Nelson, Minnesota Canola Council President. "Our goal is to give Minnesota's canola farmers the tools they need to make the coming year a profitable one."

More than 60 people were on hand to take in the presentations, socialize, win door prizes, and learn more about canola to give themselves a jump on their 2022 production plans. *Thank you speakers!*

Presentations for the event included:

[Better Yield with Miravis Neo](#)

Jason Snell, Syngenta – Chokio, MN

[Growing Nexera Canola with Bunge](#)

Taryn Olfert, Bunge – Altona, MB

[Be Confident in Winter Canola with 4 Easy Steps](#)

Mick Miller, CROPLAN by WinField United – Fairfield, MT

Enhanced Flea Beetle Protection with Buteo Start Seed Treatment

Courtney Meduna, DEKALB - Minot, ND

[Vercoras Seed Treatment](#)

Russ Trischuk, BASF - Saskatoon, SK
